Centre - RITA**

The course Presenters

**You will practice your new skills
right in the classroom, under the
guidance of an expert instructor,
and learn how to solve real-
world challenges like those you
face at work.**

What will you Learn?

Hardware Troubleshooting and Installation

This hands-on course provides you with the tools and techniques you need to repair or reconfigure your systems in the District office, maximize the performance of PC systems, troubleshoot the problems that accompany complex configurations, and recover lost data and files. You are also introduced to Windows Registry editing and hardware configuration and troubleshooting techniques.

Network Troubleshooting and Configurations

This unique course provides you with a hands-on working knowledge of the troubleshooting tools and techniques needed to identify, isolate and cure LAN faults. The course addresses problems related to cables, NICs, protocols and configuration of Hubs, Switches, ISDN and other networking devices. This course provides practical knowledge and the hands-on experience to install, troubleshoot and maintain switched and routed networks.
